Complete Pool Renovations

Any older pool and it's surroundings can be given a new life, style and character equipped with all of the modern luxuries of new pools being built today. Changing the liner is just the beginning. We can install new coping and replace the deck with beautiful stamped concrete or add lighting, giving your pool a completely different after dark swimming experience.

Change your main drain into a cost saving warm water return. How about converting your pool into a safer more enjoyable Salt Water System. You really can feel the difference.

We see your older pool simply as a blank canvas waiting for us to transform your vision into your new backyard oasis.

Other Renovation Ideas:

- Add stairs for safety and convenience
- Add a vacuum line for your automatic cleaner
- Replace your old underground pipes
- Adding a new heater might be a good idea (just in case)

Book next year's renovation at this year's pricing!

Personalized Pool Closing Kit

Our kits will be tailored to be compatible with your current pool care products and type of closing. We will use products from both BioGuard and Natural Chemistry to provide the best winterizing treatment for your pool.

Your kit may contain items including:

- Oxysheen
- Metalfree
- Back Up
- Pool Magic & Phosfree
- Stain and Scale

- Hibreshock
- Antifreeze

Total alkalinity will be tested and adjusted upon request. It is recommended that the total alkalinity be tested prior to closing. A low reading can cause a liner to wrinkle or concrete surfaces to deteriorate.

Please note that the balancing chemicals are not included in chemical kit price. (billed per kg.)
